

AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions, and listings, of claims in the application:

1. (Currently Amended) A method for simultaneously interacting with an electronic program guide using multiple devices comprising:

receiving electronic programming guide (EPG) selections entered via a separate ~~wireless remote~~ device other than a primary remote;

storing the EPG selections on a storage device; and

transmitting the EPG selections to be displayed when requested.

2. (Currently Amended) The method for simultaneously interacting with an electronic program guide using multiple devices of claim 1, ~~further including storing wherein the~~ EPG selections are stored on a broadcast server.

3. (Currently Amended) The method for simultaneously interacting with an electronic program guide using multiple devices of claim 1, ~~further including storing wherein the~~ EPG selections ~~on~~ are stored on a set top box (STB).

4. (Currently Amended) The method for simultaneously interacting with an electronic program guide using multiple devices of claim 1, ~~further including receiving electronic programming guide (EPG) selections entered via a~~ wherein the separate ~~wireless device comprises a~~ personal device assistant (PDA).

5. (Currently Amended) The method for simultaneously interacting with an

electronic program guide using multiple devices of claim 1, ~~further including receiving electronic programming guide (EPG) selections entered via a wherein the~~ separate ~~wireless~~ separate device comprises a web enabled phone.

6. (Currently Amended) The method for simultaneously interacting with an electronic program guide using multiple devices of claim 1, further including transmitting the EPG selections to the separate ~~wireless remote~~ device to be displayed for display on the ~~wireless remote~~ separate device when requested.

7. (Currently Amended) The method for simultaneously interacting with an electronic program guide using multiple devices of claim 6, further including transmitting the EPG selections to multiple separate ~~wireless remotes~~ devices to be displayed concurrently on the ~~wireless remotes~~ devices when requested.

8. (Currently Amended) The method for simultaneously interacting with an electronic program guide using multiple devices of claim 6, further including transmitting one or more programs to be separately displayed concurrently with displaying the EPG selections.

9. (Currently Amended) A machine readable medium having stored thereon a set of instructions, which when executed cause a system to perform a method comprising:

receiving electronic programming guide (EPG) selections entered via a separate ~~wireless remote~~ device other than a primary remote;

storing the EPG selections on a storage device; and

transmitting the EPG selections to be displayed when requested.

10. (Currently Amended) The machine readable medium of claim 9, ~~further including storing wherein~~ the EPG selections are stored on a broadcast server.

11. (Currently Amended) The machine readable medium of claim 9, ~~further including storing wherein~~ the EPG selections are stored on a set top box (STB).

12. (Currently Amended) The machine readable medium of claim 9, ~~further including receiving electronic programming guide (EPG) selections entered via a wherein the~~ separate ~~wireless device comprises a personal device~~ digital assistant (PDA).

13. (Currently Amended) The machine readable medium of claim 9, ~~further including receiving electronic programming guide (EPG) selections entered via a wherein the~~ separate ~~wireless device comprises a web enabled~~ phone.

14. (Currently Amended) The machine readable medium of claim 9, further including transmitting the EPG selections to the separate ~~wireless remote device~~ to be displayed on the ~~wireless remote~~ separate device when requested.

15. (Currently Amended) The machine readable medium of claim 14, further including transmitting the EPG selections to multiple separate ~~wireless remotes~~ devices to be displayed concurrently on the ~~wireless multiple remotes~~ devices when requested.

16. (Original) The machine readable medium of claim 14, further including transmitting one or more programs to be separately displayed concurrently with displaying the EPG selections.

17. (Currently Amended) A multiple electronic program guide selection system

comprising:

A a first unit at a user's location to receive electronic programming guide (EPG) selections entered via a separate ~~wireless remote~~ device other than a primary remote control;

A a second unit to store the EPG selections on a storage device; and

A a third unit to transmit the EPG selections to be displayed when requested.

18. (Currently Amended) The multiple electronic program guide selection system of claim 17, wherein the second unit ~~to store the EPG selections is~~ comprises a broadcast server.

19. (Currently Amended) The multiple electronic program guide selection system of claim 17, wherein the second unit ~~to store the EPG selections is~~ comprises a set top box (STB).

20. (Currently Amended) The multiple electronic program guide selection system of claim 17, wherein the ~~first unit receives the electronic programming guide (EPG) selections entered via a separate wireless~~ device comprises a personal device digital assistant (PDA).

21. (Currently Amended) The multiple electronic program guide selection system for receiving multiple electronic program guide selections of claim 17, wherein the ~~first unit receives electronic programming guide (EPG) selections entered via a separate device~~ comprises a wireless web phone.

22. (Currently Amended) The multiple electronic program guide selection system of claim 17, wherein the third unit transmits the EPG selections to the separate ~~wireless remote device~~ to be displayed on the wireless remote when requested.

23. (Currently Amended) The multiple electronic program guide selection system of

claim 22, wherein the third unit transmits the EPG selections to multiple separate ~~wireless~~ remotes to be displayed concurrently on the ~~wireless~~ remotes when requested.

24. (Currently Amended) The multiple electronic program guide selection system of claim 22, wherein the third unit transmits one or more programs to be separately displayed concurrently with displaying the EPG selections.
